RE: Andalex Resources, Inc.,  
Wildcat Loadout, C/007/0033  
Request for Abatement of Division Order DO-04

Dear Mr. Haddock:

Andalex Resources, Inc. recently received approval of the amendment to the Wildcat Loadout MRP addressing Division Order DO-04, related to the issue of wind-blown coal fines. Your approval was Task #3618. In addition to this approval, please note that the company has now completed the interim on-site improvements required by the Division, namely, removal of all wind-blown fines within the seven acre area identified by the Division for clean-up, and subsequent roughening (discing), mulching (using certified weed-free straw), and re-seeding (using the MRP approved seed mix). All field work was done in compliance with the approved plan and direct correspondence with Division staff and inspectors.

Now that these items have been attended to (i.e., approval of the MRP amendment, and interim cleanup and contemporaneous reclamation of the site) we hereby request abatement of Division Order DO-04. As you know from previous correspondence (9/10/2010), Andalex Resources has ceased operation of the loadout and is now in the process of legally transferring the ownership of the facility, including all permits, licenses, and rights-of-way, to the Intermountain Power Agency (IPA). Upon completion of this transfer, IPA will assume responsibility for compliance with the terms of the newly-amended (Task #3618) MRP as a requirement for beginning renewed operations of the facility.

Should you have any questions regarding this request, please feel free to contact me.

Sincerely,

David Shaver  
Resident Agent
